

Biocenter Finland

An umbrella organisation of six biocenters in Finland

- coordination and development of national research infrastructure networks
 - support to technology services provided by the infrastructure networks
- building a bridge between national and pan-European ESFRI infrastructures
 - promoting international recruitment and mobility of researchers
 - promoting commercial exploitation of research findings
 - coordination and development of researcher training

Biocenter Finland infrastructure networks

bioinformatics
biological imaging
genome-wide methods

model organisms
proteomics and metabolomics
